

Census File Format for use with 2024 HMDA/CRA Data as of July 12, 2024

Data source: DHC indicates the data source is the 2020 Demographic Housing Characteristics file; ACS indicates the data source is the 2016-2020 American Community Survey; Other indicates the data source comes from data other than one of the files provided by the Census Bureau (check the Census File Information Appendix for more information); NA indicates the data is not included in the file but is still present in the index for compatibility reasons.

Source field: This column provides either the DHC or ACS table and column number from which the data was sourced.

Redistricting data source field: If data from the DHC is also present in the 2020 Redistricting Data, the matching table and column number are included here for ease of use as most of the table and/or column numbers have changed. Otherwise, this field is left blank.

Data Type column: AN – alphanumeric (character); N – numeric (zoned decimal)
